Overview

Businesses today are utterly reliant on information technology; even the briefest interruption in service can cost a firm millions of dollars or even threaten its survival. Business professionals need at least a basic understanding of the role of management information systems in helping businesses to be efficient, effective, and competitive in our technology-oriented world.

Learning Objectives

After successful completion of this course, you will be able to:

1. Discuss the use of decision support systems for business decision making and process improvement, and explain the role of data warehouses in these systems.
2. Exemplify the use of technology—including networks and MIS infrastructure—to improve the efficiency and effectiveness of business processes.
3. Discuss the major policies businesses should implement to protect the privacy, security, and integrity of corporate and customer information.
4. Design and implement Microsoft Excel spreadsheets and Microsoft Access databases to support business decision making.
5. Explain the major types of enterprise applications and the methodologies used to develop them and manage their development.

These goals are related to the following learning goals of the business minor program:

- Students will develop analytical, problem-solving and decision-making skills that can be applied in a variety of business situations within a global business environment.
- Students will be able to use process analysis techniques and tools in order to assess and improve the ways in which organizations conduct business.
Prerequisites
Before taking this class, you should have completed 30 credit hours (i.e., sophomore standing).

Expectations
Taking a course online requires dedication and organization. In order to have a successful semester, it is important that you:

- Visit the course website regularly (at least weekly).
- Stay on schedule with the material covered, and complete all assignments on time.
- Participate actively in discussions.
- Check your Mason Live email (or, if you forward your mail, the forwarding location) daily.
- Dedicate five to seven hours per week, on average, to the class.
- Contact me promptly if a problem arises that is interfering with your performance in the class.

Learning Resources

Required Course Materials – Textbook and Connect

If you do not need a printed book, the Connect subscription is all you need. See the course website for more information, including the web link you will use to register for your Connect subscription. If you want a printed book, you can purchase a loose leaf copy directly from McGraw-Hill for $25 after buying your Connect subscription, or you can look for a copy online.

Course Website
Our course website on Blackboard serves as the information hub for this course. To view the site, visit http://mymason.gmu.edu, log on using your Mason Live user ID and password, and click the “Courses” tab. You should see MBUS302-DL1 listed; if not, please email me immediately.

The website includes a Welcome video and a “Start Here!” area providing an orientation to the course and to online learning. Please review these before starting on other course materials.

Unit Folders and Lessons
Each week’s assignments and activities can be found in unit folders on the course website. Each folder contains links to one or more lessons. Each lesson contains detailed list of readings, activities, and other assignments, and also provides perspective on the material. In addition, you can get the “big picture” of the course, with topics and due dates, from the weekly course schedule available on the course website.

Availability of Learning Tools
This course is offered completely online. Course materials, including exams (during the designated exam periods), are available 24 hours a day, 7 days a week. Virtual office hours and live online sessions (if needed) are offered at specific times; however, they are optional.
Communication

Announcements and Course Updates
You will receive an email (sent to your MasonLive email account) every Monday providing an overview of the week's activities. I will use email at other times for reminders and announcements. All emails will be posted as announcements on Blackboard. I may sometimes post lower-priority announcements on Blackboard without emailing them. It is a good idea to check the Announcements area each time you visit the course website.

In addition, Twitter users may subscribe to the “MBUS302online” Twitter feed (https://twitter.com/MBUS302online) to receive assignment reminders via Twitter.

Blackboard Collaborate
Blackboard Collaborate provides a virtual meeting area for our class. It supports audio, video, text chat, a whiteboard, and screen sharing. We will use it for virtual office hours and one-on-one meetings (see below), and possibly for optional live tutorials.

You can run Collaborate on a PC or Mac, and also on an iPad (with a reduced set of features). The course website has additional information on Collaborate.

How to Get Help
We have vastly different technology backgrounds in the class, and I expect that you may require individual help or tutoring from time to time. Please don't let yourself get frustrated if you’re struggling with a concept or assignment. Asking for help isn’t a failure—but giving up because you didn't seek help is.

The only prerequisite for seeking one-on-one help is that you have first taken advantage of all course resources related to the topic—readings, videos, and practice activities. One-on-one help is available to supplement these resources, not to replace them.

Technical Help
- If you have problems with the Mason network, Blackboard, Virtual Computer Lab (VCL), or the Respondus Lockdown Browser, contact GMU’s ITU Support Center (703-993-8870).
- If you have problems with Connect, contact McGraw-Hill’s Customer Experience Group Support Center (http://mpss.mhhe.com) by phone, online chat, or email.

Help with Course Concepts or Logistics
If you need help with course concepts or logistics, you can reach me via email (which I check frequently) or on the Ask the Professor forum on the course website. I will respond within 24 hours or less Monday through Friday, and usually on weekends as well, but see “Three Before Me” below.

Here are some options for getting help when the question isn’t quite as simple:
- Virtual office hours: Virtual office hours using Blackboard Collaborate will take the place of traditional office hours. I will announce a schedule at the start of each week. If you have a question or problem, you are welcome to “drop by” at these times.
- One-on-one sessions: If you need individual help and the scheduled virtual office hours don’t work for you, please contact me to schedule an online meeting. We can meet on Blackboard Collaborate, Skype, or the phone, whatever works best for you.
“Three Before Me”

The website and readings are your first sources for finding answers to your questions. It is your responsibility to use them, and then to ask for help if they do not provide the answers you need.

Unfortunately, past students too often asked me questions they could have answered themselves with just a few minutes of research—emailing me seemed easier than checking the website, and I am known for quick responses to email. In other words, they took unfair advantage of my willingness to help. This used up time I could have spent doing things to benefit the class as a whole.

As a result of those experiences, I was forced to set a new policy. All requests for help must be accompanied by a list of three appropriate places in the course materials where you sought the answer but didn’t find it (e.g., the syllabus, the unit folders, or a relevant video, depending on the question). The exception is if you found an answer but you’re not sure you understand. In that case, just tell me where you found the answer (you don’t need three sources); I want to know that so I can clarify the information to help future students.

This is called a “Three Before Me” policy and is becoming commonplace in education. It benefits all of us: employers want to hire (and promote) people who are able to work independently, while still understanding when it’s appropriate to ask for help.

However …

As I said at the start of this section, don’t let yourself get frustrated or upset if you run into problems. Do your best with the resources provided, but if you still need help, ask. That’s what I’m here for.

Grading and Assignments

Weeks begin on Monday and end on Sunday. All assignments are due before midnight on Sundays, except for initial posts in online discussions, which are due on Thursday in order to allow time for responses later in the week. See the Class Schedule for specific due dates.

Each unit in the course will be available one week in advance so that you can work ahead of schedule if you choose; however, you must take exams and participate in discussions during the week in which they are assigned.

The assignments in the class will earn the following maximum point values (each type of assignment is described in the sections that follow):

<table>
<thead>
<tr>
<th>Item</th>
<th># assigned</th>
<th># scores dropped</th>
<th>Points each</th>
<th>Total points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exams</td>
<td>2</td>
<td>0</td>
<td>200</td>
<td>400</td>
</tr>
<tr>
<td>Homework</td>
<td>5</td>
<td>0</td>
<td>50-80</td>
<td>315</td>
</tr>
<tr>
<td>Startup activities</td>
<td>3</td>
<td>0</td>
<td>5-10</td>
<td>25</td>
</tr>
<tr>
<td>Connect activities</td>
<td>18</td>
<td>2</td>
<td>10</td>
<td>160</td>
</tr>
<tr>
<td>Written assignments and discussions</td>
<td>6</td>
<td>1</td>
<td>20</td>
<td>100</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>26</strong></td>
<td></td>
<td><strong>1,000</strong></td>
<td></td>
</tr>
</tbody>
</table>

Grades will be assigned as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Points</th>
<th>Grade</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>900-1,000</td>
<td>D</td>
<td>600-699</td>
</tr>
<tr>
<td>B</td>
<td>800-899</td>
<td>F</td>
<td>0-599</td>
</tr>
<tr>
<td>C</td>
<td>700-799</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Exams

There will be two exams during the semester. Exams are non-cumulative, except in the sense that later material builds on early material. Exams will be “closed book” with one exception. You may use one sheet of letter-sized paper (measuring 8.5 x 11 inches) during the exam, with whatever you like written or printed on both sides. See the Exams area on Blackboard for more information on exam format, content, and preparation.

You will take exams online at a time of your choosing within a one-week time range, using a service called Respondus Monitor. You need to install a special browser, the Respondus Lockdown Browser, and you must have a webcam and microphone (they are used to record you while you take the exam). See “Technology Requirements” below for specific hardware and software requirements.

If you have a conflict with an exam period that makes it impossible for you to take it by the deadline, contact me at least two weeks in advance to discuss it. Otherwise, failure to complete an exam by the deadline will result in a score of zero, except in case of a documented emergency. Note that personal travel plans are not an acceptable reason for a schedule change.

Homework

You will complete a series of homework assignments using Microsoft Excel and Access to organize data and create reports. The course includes a series of tutorial videos, readings, and practice exercises designed to help you to learn the skills needed to complete the assignments. Assignments will be submitted on Blackboard.

You may work alone or with a partner on each of the homework assignments; however, both partners are expected to be able to demonstrate any skill required to complete the assignment.

You may take an extension of up to 48 hours (2 days) on one homework deadline without a penalty. Aside from this “free extension,” late homework will be subject to the following penalties:

<table>
<thead>
<tr>
<th>How late?</th>
<th>Penalty (points)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 12 hours</td>
<td>2</td>
</tr>
<tr>
<td>12-24 hours (1 day)</td>
<td>5</td>
</tr>
<tr>
<td>24-48 hours (2 days)</td>
<td>10</td>
</tr>
</tbody>
</table>

Homework submitted over 48 hours late will not be accepted and will receive a score of zero points. This is necessary so that solutions can be posted promptly.

Quizzes and Activities

Without the discipline imposed by regular class meetings, it’s easy to drift away from an online course. Missing assignments and cramming for exams will compromise your learning and hurt your grade. Successful online students allocate regular time slots to the class.

In order to help you to stay involved and up to date with the course material, and to give you opportunities to practice new skills, each unit of course material will include small assignments to complete. Some will be graded; others will be ungraded practice activities with solutions provided so you can check your work. These activities fall into the following categories:
Startup Activities
The Start Here! folder contains a combined quiz/survey designed both to test your understanding of “how things work” in the class, and to help me to learn more about you. In addition, during the first week of the semester, you will be asked to post a personal introduction to the class. Finally, you will test Respondus Monitor, our online exam software, to make sure it works on your computer.

Connect Activities
In most units, you will take a quiz on McGraw-Hill’s Connect website summarizing the textbook material; sometimes you will complete an interactive activity as well. After completing the activity, you may take it once more; the higher of your two scores will count. Your two lowest Connect scores will be dropped; this means you can skip two activities without a penalty. For this reason, there are no extensions offered on Connect activities.

Extra Credit: LearnSmart
The Connect website contains one or more LearnSmart exercises for each chapter in the text. LearnSmart is an adaptive question-and-answer tool; it chooses questions to ask based on your previous answers. LearnSmart integrates with the book to create a tool called SmartBook; you answer the questions as you proceed through the chapter. You also have the option of answering all questions after you finish reading the chapter. You may complete these exercises in the current week for extra credit. You may also use them for exam preparation as non-credit exercises. See the course website for more information.

“Reflect” and Practice Activities
In addition to the graded activities listed above, the unit folders also contain ungraded practice activities. These are short exercises that help you to check your understanding of concepts by applying them to a specific situation. Sample answers will be provided. They are of three types:

1. Short “Reflect” exercises asking you to use course concepts to evaluate a business situation or to provide examples of a concept in action.
2. Interactive practice activities on Connect asking questions about a concept.
3. Microsoft Excel and Access practice activities.

Sometimes students are tempted to skip these activities since they aren’t graded; however, unless you are already competent in the concepts or skills covered by the activities, you should complete them. They allow you to practice skills in isolation, helping you to prepare for exams and homework assignments where you must apply several skills to more complex examples.

Minicase Assignments and Discussions

Minicase Assignments
A few times during the semester, you will be asked to submit a journal post in which you apply course material to a specific business situation presented in a short case, called a "minicase."

Group Discussions
You will be assigned to a group of 12-15 students for online discussions related to the course material. These activities will help you to understand the topic in more depth; in addition, you will have the opportunity to practice expressing your ideas, and to respond to the ideas of your classmates. For each discussion, you will be required to make your initial post by Thursday of the given week, followed by at least two comments on others’ posts before the end of the week. See the “Group Discussions” area on Blackboard for more details.
Grading
Each discussion and written assignment is worth 20 points. Your lowest discussion OR written assignment score will be dropped from your grade.

Technology Requirements
To take this course, you will need the following hardware and software (this information is also in the “Start Here!” area of the course website):

Hardware
- A PC running Microsoft Windows XP/Vista/7/8, or a Mac running OS X 10.6 (Snow Leopard) or higher, with at least 2GB of memory. It’s best to have a screen size of at least 13 inches.
- A fast, reliable broadband Internet connection (e.g., cable, DSL). A wired connection is strongly recommended for taking exams.
- Computer speakers, headphones, or earbuds to listen to recorded content.
- A headset with microphone, or a built-in or external microphone plus headphones or earbuds, to participate in live audio sessions using tools like Blackboard Collaborate.
- Sufficient hard disk space to download required software and save your course assignments.
- A webcam (internal or external) and a microphone, for use during exams

Software
- A web browser supported by Blackboard (see Blackboard Support for more information).
- The Google Chrome browser, for use with Blackboard Collaborate (needed for screen sharing)
- Microsoft Word and PowerPoint, or other software that can read Word and PowerPoint files.
- Adobe Acrobat Reader (free download).
- A current version of Adobe Flash Player (free download).
- The Respondus Lockdown Browser, used to take exams. It has software requirements of its own (see the “Exams” area of the course website for more information).

Microsoft Office Applications
To complete the homework, you will need access to these Microsoft Office applications:

<table>
<thead>
<tr>
<th>Application</th>
<th>Acceptable versions (Windows)</th>
<th>Acceptable versions (Mac)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Access</td>
<td>2010, 2013, 2016</td>
<td>Does not run on the Mac</td>
</tr>
</tbody>
</table>

The “Microsoft Excel and Access” area on the course website offers several low-cost/no-cost options for obtaining or using these applications (including ways for Mac users to use Microsoft Access remotely).

Employer-provided Computers
If you are planning to use an employer-provided computer for class activities, please verify with the system administrator that you will be able to install the necessary software and access course materials. Corporate firewalls may restrict access to some websites and media types.
University Policies and Resources

Academic Integrity Policy
You are expected to adhere to the George Mason University Honor Code. The Honor Code prohibits actual and attempted cheating, plagiarism, lying, and stealing. These rules apply to this course:

- You may use one sheet of letter-sized paper (8.5x11 inches) as a reference during exams. You may use no other information sources during exams, whether hard copy, electronic, or human. Your answers on exams must be entirely your work, with no assistance of any sort given or received.
- For Connect activities, discussions, homework, and written assignments, you may use both hard copy and electronic references for general information when preparing your answers. However, your answers must be entirely your own work (or, if you work with a partner on the homework, yours and your partner’s) with no assistance specific to the assignment given or received. There is one exception: you are encouraged to seek assignment-specific help from the instructor if you need it after using resources provided as part of the course.

The School of Business recommends a minimum penalty of a zero on the relevant assignment (or, for more serious infractions, an F in the class) for a first-time Honor Code violation. We take the Honor Code seriously; so should you. Consult the Office of Academic Integrity website for more information about Honor Code issues.

Disability Policy
If you are a student with a disability and you need academic accommodations, please contact the Office of Disability Services to make arrangements.

Accessibility
GMU has services available to create recordings, transcripts, or other materials to meet the needs of students requiring accessible media. I have done my best to provide an accessible course (see the “Accessibility” area on Blackboard for specifics); however, please contact me if:
- You have problems using a course resource due to an accessibility issue; or
- You need access to a resource that is not yet accessible.

If you would prefer not to identify yourself, you can also report the issue anonymously on the Accessibility Issues Form provided by the GMU Web Accessibility initiative. Please be sure to provide the course number and my name so that the information reaches me quickly.

University Policies
Students must follow the GMU University Policy and the Responsible Use of Computing Policy.

University Resources
GMU provides a number of resources to facilitate student success and assist students with academic or personal issues (e.g., Counseling and Psychological Services, Learning Services, University Career Services, Writing Center). If you need assistance, please consider taking advantage of these services. If you have questions about these services and wish to discuss your situation with me first in order to determine how to obtain the help you need, please don’t hesitate to contact me.

Weekly Schedule
See the next page.
# Weekly Course Schedule – Spring, 2017

Weeks start on Mondays and end on Sundays. All assignments for the week are due before midnight on Sunday except for initial discussion posts (due on Thursday, and highlighted in red text below). See the Course Content area on Blackboard for more specifics.

<table>
