Instructor: Jongdoo Lee, Ph.D.
Office: Enterprise Hall 143
Phone: 703-993-3473
E-mail: jlee11@gmu.edu

Prerequisites:
1. MATH 113 with a minimum grade of C, or MATH U113 with a minimum grade of T, or HNRS 125 or HNRT 125 or HNRT 225 with a minimum grade of C.
2. Essential and expected knowledge: Proficiency in elementary algebra and geometry. Familiarity with recent versions of MS Word, PowerPoint, and Excel. Deficiencies in any of these areas should be self-remediated.

University Catalog Description:
This course introduces the concept of business analytics and why businesses use analytics to create and sustain competitive advantage. Topics include data types, summarization and graphical display of data, application of basic probability rules, and probability distributions. The course also introduces students to fundamentals of spreadsheets and their use in business applications.

Undergraduate program learning goals (those in bold will be addressed in this class):

1. Our students will be competent in their discipline.
2. Our students will be aware of the uses of technology in business.
3. Our students will be effective communicators.
4. Our students will have an interdisciplinary perspective.
5. Our students will be knowledgeable about global business and trade.
6. Our students will recognize the importance of ethical decisions.
7. Our students will be knowledgeable about the legal environment of business.
8. Our students will be knowledgeable about team dynamics and the characteristics of effective teams.
9. Our students will understand the value of diversity and the importance of managing diversity in the context of business.
10. Our students will be critical thinkers.

This syllabus is subject to change. Any changes to this syllabus will be formally announced in Blackboard.
Approach to Learning:

This course is geared towards the future business professional engaged in decision making or decision support. The emphasis is on business applications, and not mathematics. Lectures are the formal presentation and teaching of the material and basic problem solving skills; discussions and questions are highly encouraged.

Required Texts and Learning Materials:

   Chapters 3 and 7 are available for individual purchase for $14.95 each. The purchase of a chapter will include Appendix A.  

Computer/Software/Email:

Access to the internet and a computer is required. Many of the course material will be online in our Blackboard course. Communication will be via Blackboard and/or your GMU e-mail only. I will only respond to gmu.edu e-mails and will not respond to e-mails written on a private account.

The PC version of Microsoft Excel 2013 will be used in this class. The student is required to bring a laptop to class with Excel.

Microsoft Excel 2013 is available for download for GMU students. The software may run only on a computer with the appropriate Microsoft Windows operating system. During this class, we are unable to provide advice and support for the use of Macintosh computers and other versions of this software.

It is your responsibility to make sure your assignments meet the required PC standards. If you have a Mac, you may need to have a dual-booting or virtual machine to run the Microsoft Excel program correctly.

Methods of Student Evaluation:

Students will be evaluated based on following areas.

Grading Weight

<table>
<thead>
<tr>
<th>Component</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Attendance/Participation</td>
<td>5%</td>
</tr>
<tr>
<td>Two HWs</td>
<td>Each 10%</td>
</tr>
<tr>
<td>Two Quizzes</td>
<td>Each 10%</td>
</tr>
<tr>
<td>Midterm exam</td>
<td>20%</td>
</tr>
<tr>
<td>Final Exam</td>
<td>35%</td>
</tr>
</tbody>
</table>

**Note:** DISRUPTIVE BEHAVIOR WILL NOT BE TOLERATED

**CELL PHONES MUST BE TURNED OFF DURING CLASS**
**Course Grade**

1. Students must be officially registered in this section to receive a grade. It is the sole responsibility of the student to verify their own registration status. (I will not verify your registration.) Students will not receive a grade if your name does not appear on the official class list. (Don’t wait until the end of the semester to be surprised.) Registration problems should be directed to either the SOM Office of Student Services or the Registrar’s Office.

2. The final letter grade is assigned objectively and strictly according to the WEIGHTED average of the numerical scores of all exams, quizzes, and assignments.

3. Final course letter grade assignments:

<table>
<thead>
<tr>
<th>COURSE AVERAGE</th>
<th>COURSE GRADE</th>
<th>COURSE AVERAGE</th>
<th>COURSE GRADE</th>
</tr>
</thead>
<tbody>
<tr>
<td>97.00 to 100</td>
<td>A+</td>
<td>80.00 to 82.99</td>
<td>B-</td>

<tr>
<td>83.00 to 86.99</td>
<td>B</td>
<td>0 to 59.99</td>
<td>F</td>
</tr>
</tbody>
</table>

**EXAMS:** Exam dates are provided in the schedule. No make-up exams will be given except in Documented Emergency. Each will involve a mix of mechanical skills and conceptual reasoning. The best possible preparation for them is regular attendance and completion of assigned homework and reading.

**Attendance:**

Class attendance is essential part of learning for this course. If you have to miss any lectures, you are responsible for obtaining any information given in the class. I will take attendance on random days.

**Homework, Quizzes & Class Work:**

Students are expected to read relevant sections of the textbook prior to attending class. Written homework, quizzes, and class work will be graded. Students may work together and submit the homework as a team (Max 2). Each student in the team gets the same grade on the homework. Due dates of homework will be given in class, and are on posted on Blackboard. Late assignments will not be accepted. Quizzes and class work are given at the discretion of the instructor and frequently reflect material that has recently been discussed in class. To encourage attendance, instructors will not give makeup quizzes or class work.

**Disability:**

All academic accommodations due to disability must be arranged through the Office of Disability Services (ODS). If you are a student with a disability and you require academic accommodations, please contact ODS at 703-993-2474. I will cooperate fully with the ODS to accommodate a student’s special needs.

**Course Objectives:**

This course examines the use of statistical methods as analytical tools for understanding and analyzing business problems, and for supporting business decision-making. Topics will include:
Data presentation and summarization, Probability Distributions, and Business Spreadsheets, It is geared for the business professional engaged in decision making or decision support. The emphasis is on business applications, and not mathematics. Students will also possess an adequate level of proficiency in and comfort with spreadsheet software. The format will be lectures, but discussions and questions are highly encouraged.

ADDITIONAL INFORMATION

- The best way to reach me is by e-mail. My office phone number is not a reliable way to leave a message for me during summer session.
- Students with differing abilities should arrange to meet with me by the end of the first week of classes to arrange for reasonable accommodations for their learning needs.
- Athletes with travel schedules should meet with me by the end of the first week of classes to discuss any necessary arrangements that need to be made.
- Arrangements for any religious observances or GMU sanctioned activity must be arranged with the instructor at least one week prior to the event.
- By remaining registered in the course through drop/add period, you agree to all terms and policies set forth in the syllabus.

Course Topics:

- Data types
  - Qualitative vs. quantitative
  - Qualitative: Ordinal vs. nominal
  - Quantitative: Discrete vs. continuous
  - Measurement scales: Interval vs. ratio
- Data presentation: Tabular and graphical methods
  - Frequency, relative frequency, and cumulative distributions
  - Frequency and relative frequency histograms
- Data summarization: Numerical summary sample statistics (and population parameters)
  - Mean, Median, Mode, Midrange, Midquartile, Range, Interquartile range (and IQR/R)
  - Variance, Standard deviation, Coefficient of Variation
- Probability
  - Joint, Marginal and Conditional probability
  - Probability rules
  - Bayes’ Law
- Random Variables and Discrete Probability distributions
  - Random variables and probability distributions
  - Uniform distribution
  - Binomial distribution
  - Poisson distribution
- Continuous Random Variables and Probability distributions
  - Probability density functions
  - Normal distribution
- Business Spreadsheets
  - Relative and absolute references
  - Using formulas involving arithmetic operators +, -, *, and /
  - Using parentheses and percentage calculations
Numbering formats, e.g., currency, accounting, comma, percent, etc.

Copy formulas and filling neighboring ranges with data and data series

Testing conditions (involving =, <, >, <=, >=, AND, OR, etc.)
  - “IF” statements, including Nested-IFs

Using Statistical functions

Using financial functions

Conditional formatting and copying/removing formats

Creating simple graphs/charts from a spreadsheet data range (e.g., bar/line/pie charts, 2d-/3d-charts, etc.),
  - When to use each chart type

Working with data in tables
  - Sorting, filtering etc.
  - Grouping/separating data in a table, generating subtotals, creating summaries
  - Designing, building, using, and adding to MODIFYING PivotTables

Writing formulas linking data in multiple sheets in a workbook

Goal Seek

Cross Tabs

Academic Integrity: It is expected that students adhere to the George Mason University Honor Code as it relates to integrity regarding coursework and grades. The Honor Code reads as follows: “To promote a stronger sense of mutual responsibility, respect, trust, and fairness among all members of the George Mason University community and with the desire for greater academic and personal achievement, we, the student members of the University Community have set forth this: Student members of the George Mason University community pledge not to cheat, plagiarize, steal and/or lie in matters related to academic work.” More information about the Honor Code, including definitions of cheating, lying, and plagiarism, can be found at the Office of Academic Integrity website at oai.gmu.edu

Mason takes instances of academic dishonesty very seriously. While the faculty have the authority to recommend the academic and educational sanctions for Honor Code violations listed below, there can be additional consequences based on the College your program is housed in. At the very least a disciplinary record is created whenever a student is found responsible for violating the honor code.

Typical academic sanctions include but are not limited to:

1. A Grade Reduction on the assignment
2. A rewrite of a paper with a grade reduction
3. Zero on the assignment
4. A grade reduction in the course
5. F in the course
6. One semester or year non academic suspension
7. Permanent dismissal from the institution

Educational Sanctions can also be included. These sanctions may be:

1) Writing Center Visits (no more than three sessions)
2) Academic Integrity Seminar
# BUS 210: SUMMER 2016
